

Curricular Vitae

Ali O. Azghani, Ph.D.

Professor of Biology
University of Texas at Tyler
3900 University Blvd
Tyler, Texas 75799
<http://www.uttyler.edu/biology/faculty/>

Office: (903) 566-7332
Lab: (903) 566-7259
Fax: (903) 566-7189
aazghani@uttyler.edu

ACADEMIC BACKBGOUND

Ph.D. 1986, Radiation Microbiology, Texas Woman's University (TWU), Denton, TX
M.Sc. 1981, Microbiology, TWU
B.Sc. 1972, Medical Technology, Pharmacy School, University of Tabriz, Tabriz, Iran
Fellow, Pulmonary Injury, 1986-1988, University of Texas Health Science Center, Tyler, Texas (UTHSCT)

EMPLOYMENT

2015 – Present Professor of Biology, University of Texas at Tyler (UTT)
2005 – 2015 Associate Professor, UTT
2005 - Present Adjunct Faculty, Biomedical Research, University of Texas Health Science Center, Tyler, Texas (UTHSCT)
1998 - 2005 Assistant Professor of Medicine, UTHSCT
1996 - 1998 Director, Research Projects, Infinity Care, Inc., Tyler, Texas
1992 - 1996 Assistant Professor, Biomedical Research, UTHSCT
1989 - 1992 Instructor, Department of Biochemistry, UTHSCT
1986 - 1988 Postdoctoral Fellow, Dept. of Biochemistry, UTHSCT
1979 - 1985 Teaching Assistant, Dept. of Biology, TWU
1972 - 1976 Medical Technologist, Cardiovascular Research Institute, Tehran, Iran.

TEACHING EXPERIENCE

2005 - Present University of Texas at Tyler
1994 - 2004 Adjunct Faculty, UTT
1990 - 1992 Adjunct Faculty, Jarvis Christian College, Tyler, TX.
1988 - 1990 Adjunct Faculty, Tyler Junior College
1978 - 1984 Teaching Assistant, TWU

COURSES CURRENTLY TAUGHT AT UTT

BIOL 2301 Anatomy and Physiology; Biol 3334/3134 Cell Biology & Lab; BIOL 4350 Immunology;
Biol 3343/3144 Physiology; BIOL 4199 Bacterial Pathogenesis; BIOL 5383 Host-Pathogen Interaction;
BIOL 5380 Cellular Physiology; BIOL 5193 Graduate Seminar; BIOL 5396 Thesis.

RESEARCH PROJECTS

I. Molecular Mechanism of Pulmonary Edema- *Pseudomonas aeruginosa* frequently infects patients with cystic fibrosis and immunocompromised individuals. One of the first steps in pulmonary injury is the loss of epithelium integrity; which is followed by inflammation and edema. This project explores the scope of *P. aeruginosa* elastase (PE) interaction with host cells that promotes cellular injury and elicit proinflammatory responses. Currently, we utilize genetically engineered virus like nanoparticles (VAL) carrying active elastase as well as proximity ligand assay to investigate the mechanism of PE-induced EGFR activation and downstream signaling outcomes. Description of the molecular pathways could

expedite the development of novel interventions for treatment of Pseudomonas-mediated lung injury in the era of emerging multidrug resistant strains.

II. Genetic Determinants of Multiple Drug Resistance in *P. aeruginosa*-This Fulbright-funded project conducts surveys on the adherence of clinicians to guidelines and patients' compliance in two different cultural settings. We identify antibiotic resistant clinical isolates common to East Texas, USA and Baku, Azerbaijan in relation to their set guidelines. Currently, we investigate the genetic determinants of multi-drug resistance *P. aeruginosa* isolates as a prototype bacterial strain. In an effort to measure the outcomes of this evidence-based research, we will conduct seminars and training workshops for clinicians and dentists in Azerbaijan. To that end, a visiting Fulbright scholar from Khazar University is conducting research in the lab through Feb 2022.

III. Design and Use of Nanocarriers in Research and Therapeutics- Liposomes are emerging as a preferred drug carrier to combat multidrug resistant strains due to their ability to fuse with the prokaryotic cell membrane as the endpoint of their carrier function. This collaborative research investigates the efficacy and mechanism of action of existing antibiotics encapsulate in different liposomal construct in combating antibiotic resistant *P. aeruginosa*.

IV. Plasminogen Activator inhibitor (PAI-1)- Loculated pleural effusion in the setting of pleuritis is associated with poor outcomes. As a co-investigator of a research team at UT Health Science Center at Tyler, we identified PAI-1 activity as a biomarker and target for therapeutic intervention. The ultimate goal of the recently funded pre-clinical project by NIH, is to identify a novel PAI-1-targeted intrapleural fibrinolytic therapeutic. We intend to advance this research to IND-enabling work in an effort to provide better, safer treatment for patients with pleural loculation.

V. Pathogenesis of Pleural Inflammation and Scarring- *Streptococcus pneumoniae* is one of the most prevalent bacteria in pneumonia and parapneumonic empyema. The exact pathogenesis of this bacterium is still being investigated and successful therapeutic treatment to reduce the cytotoxicity effects of *S. pneumoniae* is yet to be uncovered. The main objective of this project is to examine the role of Pneumolysin from *S. pneumoniae* on pulmonary injury in the context of apoptosis and pyroptosis *in vitro*. Exploiting the cellular and molecular mechanism of parapneumonic pleurisy will lead to more effective, less invasive treatment strategies following pleural effusion.

PEER REVIEWED PUBLICATIONS

Students' publications are in Italics

1. Galina Florova, René A. Girard, **Ali O. Azghani**, Krishna Sarva, Ann Buchanan, Sophia Karandashova, Christian J. DeVera, Danna Morris, Mignote Chamiso, Kathleen Koenig, Douglas B. Cines, Steven Idell, and Andrey A. Komissarov. Precision targeting of the plasminogen activator inhibitor-1 mechanism increases efficacy of fibrinolytic therapy in empyema. *Physiological Reports*. 2021;9:e14861

INTERNAL AND EXTERNAL GRANT

Ongoing Research Support

1. 2021- 2022 Fulbright Scholar Supplement, prophylactic application of antibiotics in the livestock and the poultry industry.

Role: PI, \$7,500.00.

2. 2021-2022 University of Texas at Tyler, Molecular Mechanisms of Growth Factor Receptor Activation by Bacterial Protease: Application and Education of Nanocarrier Biotechnology. Role: PI, 5,000.00.
3. 2020- 2022 NIH R33 HL154103-01: Optimization of a Rabbit Retained Hemothorax Model for Evidence-Based Pharmacologic Interventions. PI: Steven Idell
Role: Co-Investigator, ~28,000.00/yr.
4. 2021-2024 NIH RO1 Enhanced Delivery of Thrombolytic Carriers for Empyema.
PI: Andrey Komissarov, UTHSC.
Role: Co- Investigator; ~50,000.00/yr

Recently Completed Research Support

1. 2017- 2020 NIH, Delivery of PAI-1-targeted Intrapleural Fibrinolytic Therapy for Empyema, PI: Andrey Komissarov, UTHSC.
Role: Co- Investigator
2. 2019-2020 – University of Texas at Tyler, Molecular Mechanisms of Growth Factor Receptor Activation by Bacterial Protease: Application and Education of Nanocarrier Biotechnology.
Role: PI
3. 2018-2019 – University of Texas at Tyler, Molecular Mechanisms of Growth Factor Receptor Activation by Bacterial Protease: Application and Education of Nanocarrier Biotechnology.
Role: PI
4. 2018-2019 Fulbright US Scholar Program, Risk factors associated with the development of multiple drug resistant bacteria in healthcare organizations. Baku, Azerbaijan.
Role: PI

- 2014 Gulf Coast Summer Institute, July 23-25, 2014, LSU, LA. “Lessons Learned from Student-Centered Teaching”
- 2014 ASM, Texas Fall meeting 2014, Strategies for Team-Based Scientific Teaching.
- 2014 UTT biology seminar series, Oct 10, 2014. Pathogenesis and Treatment of P. aeruginosa Infection: Past, Present, and Future.
- 2013 CCRI: Faculty Collaborative Culminating Conference, May 16, 2013. “Scientific way of Knowing”
- 2013 American Society for Microbiology, Texas Branch. Baylor University, Waco, TX
- 2012 ACRP Global Conference and Exhibition, April 14-17, Houston, TX
- 2010 Association of Clinical Research Professional (ACRP), North Texas Chapter, Dallas, TX
- 2009 Dept. of Biochemistry, Laurentian University, Ontario, Canada
- 2009 Association of Clinical Research Professional, Global Meeting, Denver, CO
- 2008 Association of Pharmaceutical Physicians and Investigators, International Meeting, Boston, MA.
- 2008 American Society for Microbiology, Texas Branch Spring Meeting, Austin, TX
- 2007 Association of Clinical Research Professionals, International Meeting, Seattle, WA
- 2006 Association of Clinical Research Professionals, Annual Meeting, Phoenix, AZ
- 2005 Association of Clinical Research Professionals North Texas Chapter, Dallas, TX
- 2003 Dept. of Surgery, North Shore - LIJ Research Institute, Manhasset, NY
- 2002 Board of Directors, Smith County Division of the American Heart Association, Tyler, TX
- 1996 Dept. of Biochemistry & Anaerobic Micro, Virginia Institute and State University
- 1995 Dept. of Biology, The University of Texas at Tyler (UTT)
- 1993 Dept. of Pulmonary & Critical Care Med, UT Southwestern Medical School, Dallas, TX
- 1993 International Congress of Physiology and Pharmacology, University of Tabriz, Iran

Community and Local Schools

- 2017 Mentoring the winners of NASA’s Student Spaceflight Experiments Program (SEEP) at Bullard High School. The winning project, “The Effects of Microgravity on S. Tuberosum Resistance to P. infestans,” will be flown to the international Space Station aboard Mission 9 in Fall 2016. Four students preparing the space module and running the earth portion of the experiment in Azghani lab.
- 2014 Organized a “Hereditary Cancer Public Awareness” Meeting on March 22, 2014, UTT. Keynote Speaker: Dr. Patrick Lynch, Professor of Medicine, MD Anderson Cancer Center, Panelists included: Dr. E. Sauter, UTHSC; Dr. R. Cali, MF Hospital and two Nurse Practitioners.
- 2014 Austin Elementary School, Tyler, TX, Read-a-thon focusing on Science, Technology, Engineering and Math (STEM)
- 2014 Officiate area High Schools’ Soccer games
- 2008 Grace Community High school, How to Conduct Biological Science Experiments, Tyler, TX

STUDENT ADVISING

GRADUATE STUDENTS

Current UTT Graduate Students

1. Sofia Tamoir, BS.
2. Ashley Dalby-Non Thesis track- Review paper on physiology

Graduates

1. Dustin Esmond, M.S. Biology – Research Topic: Genetic determinants of multidrug resistant *Pseudomonas aeruginosa*
2. Derek Draper, B.S. Biology – Research Topic: Mechanism of activation of Epidermal growth factor receptor by *Pseudomonas aeruginosa* Elastase.
3. Craig Peek, MS, Biology –Review Research Paper on Microbiome
4. Bidisha Pal, MS, Biology, 2015. *Pseudomonas aeruginosa* Elastase Induces Restructuring of Actin Cytoskeleton by Phosphorylation of RhoA Proteins.
5. Brandon Beddingfield, MS, Biology, 2014. The role of PIUA, an outer membrane iron receptor, in the pathogenesis of *pseudomonas aeruginosa*
6. Omar Castillo, M.S. Biology, 2013. Cellular mechanisms of parthenogenesis of *Pseudomonas aeruginosa*.
7. Kourtney Neal, M.S. Biology, 2012. Human lung fibroblasts influence on pulmonary inflammation.
8. Curtis Clark, M.S. Biology, 2009. Mechanism of epithelial barrier disruption by *Pseudomonas aeruginosa* elastase.
9. Ashraf Zahra, MD, 2003, UTHSCT – Student of the Graduate Program, General Surgery Department, Al Azhar, University, Cairo, Egypt.

Graduate Committees – UTT/ UTHSC

MS in Biology/Biotechnology

1. Charlotte Huckestein, 2022- Development of companion assay to assist in the study of fibrinolytic therapy for retained hemothorax.
2. Aalan Izzarraga 2020 - Prevalence of snake fungal disease caused by *ophidiomyces ophiodiicola* in east Texas.
3. Catherine Martini, 2020, Testing the combined module swapping and repair by modification strategies: a step toward a universal toolbox
4. Lauren E. Davis, 2017, Genotypic and Phenotypic Investigation of a Possible New *Mycobacterium kansasii* subspecies.

5. Kelsey Howard , 2016, Mechanism of Endothelial Protein c Receptor (epcr)- mediated Apoptosis in Mesothelioma Cells
6. Briana Echols, 2016, Effects of a Triterpenoid Antioxidant on IAV Induced Lung Inflammatory Response in Mice
7. Courtney Mitchell, 2015, Organic Dust Induced Lung Inflammatory response in Mice
8. Han Chen, 2015, Characterization and Prevalence of Mycobacterium abscesses Subgroups in Cystic Fibrosis Pulmonary Infections”
9. Terry Ray Smith, 2015, Protective Mechanisms against Influenza Infection
10. Henry L. Schreiber IV, Advisor: Dr. Blake R. Bextine, 2011. Genetic analysis of the prophage regions of a phytopathogenic bacterium.
11. Kaitlyn Pettingill, Advisor: Dr. Neil Ford. 2013. Physiological consequences of compensatory growth: a look at snake species exhibiting sexual size dimorphism.
12. Jeremy Chamberlain, Advisor: Dr. Neil Ford. 2012. Stochastic life-history variation in populations of western ribbon snakes (Thamnophis proximus) in East Texas
13. Katie Patrick, Advisor: Dr. John S. Placyk, Jr. 2012. Effects of the herbicide atrazine on the behavior of the checkered gartersnake (Thamnophis marcianus).

INTERDISCIPLINARY RESEARCH/ADVISING

M.S. in Kinesiology

Andrea Grzybowski, MS, 2014. Hepatitis E Seroprevalence Study in canis lupis familiaris and Associations to Human Owners, Smith County, Texas

MS in Computer Sciences

1. Sachar, P. MS, Computer Sciences, 2006. A Knowledge Base for Biological Experiments.
2. Yarlagadda, B., MS, Computer Sciences, 2008. Artificial Neural Network-Based Estimation for Pseudomonas aeruginosa Experiments

Graduate Committee – International

Laurentian University, Ontario, Canada

1. YiMei Jia, Ph.D. Biochemistry, 2009, Lipid-Based Nanoparticle Formulations for Delivery of Clarithromycin for the Treatment of Pseudomonas Lung Infections in Cystic Fibrosis.
2. Shawn Rossi, MS Biochemistry, 2004, Antimicrobial efficacy of a new antibiotic-loaded poly (hydroxybutyric-co-hydroxyvaleric acid) controlled release system.

RECENT Undergraduate Research Students- Azghani Lab, 2014-

Curtis Clark, Lauren Thomas, Samantha Steinberg, Josh Kleam, Erin Coley, Christian Stacks, Andrew Griffin, Isaiha Reyna, Sarah Atwell, Douglas Vaughan, Dominique Wright, Molly Fisher, Brenda Arras, Spencer Shastid, Jesus Espinoza, Lee Parker, Molly Fischer, Dusting DeLong, Shandis Fancher, Raheal Egbe, Mercedes Delgado, Cole Blemings, Tabetha Hawkins, Esther , and Justin Wright.

Mentoring Senior Students with their Scientific Communication Project

2015 – Antwaneta Wallace, Idah Mozwa, Trey Carter, Dominick Wright, Rachel Eldore
Douglas Vaughan, Spencer Shastid, Lauren Downey, Adriana Sanders, and Erica Forester, E.
Forester, A. Morris.

HONORS & AWARDS

1. Mentoring Award, American Society for Microbiology, Texas Branch- Nov. 2019
2. President, American Society for Microbiology- July 2015-2017
3. Editor, International Issues in Biology and Pharmaceutical, 2016-
4. Associate Editor, Drug Design & Delivery (Open Access, UK) – 2014-
5. National Academies Education Fellow in the Life Sciences- 2013
6. District Director, National Biological Honor Society (TriBeta) 2010-
7. President, North Texas Chapter of Associates of Clinical Research
Professionals (ACRP) 2007 - 2008

LEADERSHIP and PROFESSIONAL SERVICES

Service Activities - University of Texas at Tyler

2021	Biology Faculty Search Committee
2018 -	CAS Commencement committee
2014	New Core Workgroup
2014	Research Integrity Sub-Committee
213-14	Microbiology Search Committee
2014 - 2017	Faculty Senate, Senator
2013- Present	Chair, Institutional Biosafety Committee
2013-2015	CAS Commencement committee
2011-2012	Undergraduate Council
2011-2014	Microbiology Search Committee, Chair
2009-2011	Faculty Senate, Senator
2010	Faculty, Math Camp for incoming freshmen
2008	Discover Science Summer Camp - Held a half day Biology session
2008-2011	UTT-Institutional Animal Care and Use Committee (IACUC)
2007-2013	Institutional Biohazard Committee, Chair.
2007-2018	Advisor, KAPPA XI Chapter (UTT), Beta Beta Beta National Biological Society
2006 -2009	Information Technology Committee
2006-2007	Biology Faculty Search Committee

University of Texas Health Science Center, Tyler, TX

2005 - 2006	Chair, Governance committee, Research Faculty Assembly, UTHSCT.
2004 – 2005	Chair, Research Core, CF and Childhood Diseases Steering Committee, UTHSC
2005 - 2006	Chair, Governance committee, Research Faculty Assembly, UTHSCT.

NATIONAL ORGANIZATIONS

Leadership

2015- 2017 President, American Society for Microbiology, Texas Branch
 2011- 2019 District Director, Biological Honor Society- Southcentral Region
 2011 Committee member, Southwestern Association of Naturalists Meeting, UTT
 2010 Director, Fall Meeting of the Texas Branch of American Society for Microbiology, UTT
 2010 Chair, Advancement Committee, TX ASM
 2009 Madison Who's Who, Executives and Professionals
 2007- Advisor, KAPPA XI Chapter (UTT), Beta Beta Beta National Biological Society
 2007 - 2008 President, North Texas Chapter of Associates of Clinical Research Professionals (ACRP)
 2002 - 2006 Chair, Newsletter Committee, ACRP, NTX
 2001 - 2002 Chair, Membership Committee, ACRP, NTX

Membership

2014- Collaborative Group of Americas on Inherited Colorectal Cancer
 2013- International Society for Gastrointestinal Hereditary Tumors
 2008 - Human Anatomy and Physiology Society
 1994 - Association of Clinical Research Professionals
 1990 - American Thoracic Society
 1979 - American Society for Microbiology; National and Texas chapter

EDITORSHIP

JOURNALS

Ex-Editor, Issues in Biological and Pharmaceutical Research
 Associate Editor, OA Drug Design & Delivery (Open Access, UK)

Ad-hoc Reviewer for

1. Am. J. Respir. Cell Mol. Biol; 2. Microbes and Infections; 3. Microbial Pathogenesis; 4. Physiological Genomics; 5. International Journal of Nanomedicine; 6. American Journal of Respiratory Cell and Molecular Biology; 7. Journal of Pharmacy and Pharmacology (UK); 8. Molecular and Cellular Biochemistry; 9. Trends in Microbiology (UK); 10. Journal of Inflammation Research; 11. Journal of Infection and Drug Resistance; 12. Annals of the American Thoracic Society; 13. Molecular Medicine - The Feinstein Institute for Medical Research, USA; 14. Molecular and Cellular Biochemistry; 15. Nature Review (UK); Frontiers Journals.

BOOKS

Editor in Chief

Regulation of the Inflammatory Response in Health and Disease, Research Signpost, 2011. Edited by A. Azghani and Edmund Miller.

Guest Editor

McKinley/O'Loughlin/Bidle. of Anatomy & Physiology: An Integrative Approach, 1st Edition. 2011.

Jenkins Human Anatomy and Physiology, 3rd Edition, Wiley & Sons, Inc. 2010.

Stephen J. Juris's forthcoming immunology textbook, Oxford University Press – Higher Education.

GRANT REVIEWER FOR

2019- Fulbright students and Faculty Scholar awards
 2007 - 2008 American Association for Advancement of Science
 2009 - 2010 American Heart Association

COMMUNITY SERVICE

1996 - 2019 Tyler Soccer Association, Officiate area High Schools UIL and
Recreational Soccer games.

1996 – 2005 Asthma Camp for Kids, Sponsored by UTHCT & ALA, Martial Arts
Instructor.

1996 - 2006 Tyler Bicycle Club, Vice President, Editorial (Exercise Physiology).

1997 - 1998 Tyler Chamber of Commerce, Chairman, PR Subcommittee.
